Chairwoman Nita M. Lowey U.S. House of Representatives Committee on Appropriations Washington, DC 20515

Chairwoman Rosa DeLauro Subcommittee on Labor, Health and Human Services, Education, and Related Agencies U.S. House of Representatives Committee on Appropriations Washington, DC 20515 Ranking Member Kay Granger U.S. House of Representatives Committee on Appropriations Washington, DC 20515

Ranking Member Tom Cole Subcommittee on Labor, Health and Human Services, Education, and Related Agencies U.S. House of Representatives Committee on Appropriations Washington, D.C. 20515

Dear Chairwomen Lowey and DeLauro and Ranking Members Granger and Cole:

As you consider appropriations for Fiscal Year (FY) 2020, the undersigned 166 national, state, and local medical, public health, and research organizations write to ask you to provide \$50 million in funding for the Centers for Disease Control and Prevention (CDC) to conduct public health research into firearm morbidity and mortality prevention.

In 2017, there were over 39,000 U.S. firearm-related fatalities.<sup>i</sup> Federally funded public health research has a proven track record of reducing public health-related deaths, whether from motor vehicle crashes, smoking, or Sudden Infant Death Syndrome. This same approach should be applied to increasing gun safety and reducing firearm-related injuries and deaths, and CDC research will be as critical to that effort as it was to these previous public health achievements. The foundation of a public health approach is rigorous research that can accurately quantify and describe the facets of an issue and identify opportunities for reducing its related morbidity and mortality.

We were heartened by U.S. Department of Health and Human Services (HHS) Secretary Alex Azar's February 2018 comments clarifying that the Dickey Amendment does not prohibit CDC from funding gun violence prevention research. As you know, the Dickey Amendment was a 1996 amendment to a federal spending bill indicating that the CDC could not advocate for or promote gun control. This language created a chilling effect on public health research on firearm morbidity and mortality prevention at the federal level. Despite the amendment sponsor's later statement that he never intended to undermine public health research, the practical effect has been just that: CDC has not funded needed research into important issues including the best ways to prevent unintended firearm injuries and fatalities among women and children; the most effective methods to prevent firearm-related suicides; the measures that can best prevent the next shooting at a school or public place; and numerous other vital public health questions.

Our groups strongly urge the House to provide CDC with \$50 million specifically for firearm morbidity and mortality prevention research as part of FY 2020 appropriations. If provided on an annual basis, this funding could support the creation of 10 to 20 new large multi-year studies each year (or even more single-year studies) and the rebuilding of a research community that has shrunk in the decades since the Dickey Amendment. Robust research on motor vehicle crashes and subsequent legislation has helped save hundreds of thousands of lives

through public health interventions, including seat belts and other safety features. The same approach can help reduce gun violence in our communities, including ensuring CDC is able to adequately fund research into this public health priority.

Our organizations stand ready to work with you to support this critical effort. Thank you for your consideration.

Sincerely,
