The Honorable Tammy Baldwin Chair Subcommittee on Labor, Health and Human Services, Education, and Related Agencies Senate Committee on Appropriations Washington, DC 20510

The Honorable Shelley Moore Capito Ranking Member Subcommittee on Labor, Health and Human Services, Education, and Related Agencies Senate Committee on Appropriations Washington, DC 20510 The Honorable Robert Aderholt Chair Subcommittee on Labor, Health and Human Services, Education, and Related Agencies House Committee on Appropriations Washington, DC 20515

The Honorable Rosa DeLauro Ranking Member Subcommittee on Labor, Health and Human Services, Education, and Related Agencies House Committee on Appropriations Washington, DC 20515

RE: Palliative Care Research Fiscal Year 2024 Request; National Institutes of Health

Dear Chairs Baldwin and Aderholt and Ranking Members Capito and DeLauro:

Thank you for your ongoing bipartisan, bicameral, and steadfast leadership in support of patients and families facing serious illness. The Patient Quality of Life Coalition (PQLC) was established to advance their unique interests and includes more than 40 organizations dedicated to improving quality of care and quality of life for all patients, from pediatrics to geriatrics, as well as supporting public policies that improve and expand access to quality palliative care and appropriate pain management. PQLC members represent patients, caregivers, health professionals, and health care systems.

REQUEST

On behalf of our nationwide network of advocates, we urge you to support access to quality palliative care and appropriate, effective pain management by prioritizing a *Palliative Care, Trans-Institute Strategy* led by the National Institute of Aging (NIA) in the Fiscal Year 2024 Labor, Health and Human Services, Education, and Related Agencies appropriations bill. We offer the language below for your consideration:

Palliative Care, Trans-Institute Strategy.– Palliative care is specialized medical care for people living with a serious illness and is focused on treating the discomfort, symptoms, and stress of such illness. Palliative care has the potential to improve patient care, patient-clinician communication, and patient-centered outcomes while decreasing unwanted and/or burdensome treatments and enhancing quality of life for people with serious illness, their loved ones, and their care partners. The Committee provides \$12,500,000 for NIA to implement a trans-Institute, multi-disease strategy to focus, expand, and intensify national research programs in palliative care. Funding would establish a comprehensive multi-Institute and multi-Center initiative aimed at a wide variety of palliative care research, training, dissemination, and implementation of projects to intensify the strategic coordination of palliative care research efforts. Funding is provided to establish an extramural-based palliative care consortium with no less than three sites to provide technical assistance, pilot and exploratory grant funding,

research dissemination, data repositories, data analytics, and career development support for interdisciplinary palliative care. Of this amount, at least \$3,000,000 is provided for several multi-year, early-career development grants modeled after NIA's GEMSSTAR program. Appropriations provided in fiscal year 2024 for training is expected to cover 2 years of funding for career development awards. The Committee requests a briefing within 120 days after enactment of this Act on how this strategy will be established and implemented, including timelines on when funding opportunities will be issued and when funding will be awarded.

We greatly appreciate the Appropriations Committees' previous support of advancing palliative care research, especially the report language included in the fiscal years (FY) 2011, 2019, and 2023 LHHS reports. As you may know, the FY 2024 Congressional Justification for National Institutes of Health's (NIH) summarized the ongoing activities related to palliative care research and responded to the Subcommittees' request to "ensure that palliative care is integrated into all areas of research across NIH" and to provide an update on plans to coordinate such research. The requested funding will support the need for NIH to develop and implement a trans-Institute strategy to expand and intensify national research programs in palliative care.

Our organizations welcome the opportunity to discuss our views with you. If you have any questions, please contact Daniel E. Smith, acting chair of PQLC at <u>dan.smith@advocacysmiths.com</u>.

Sincerely,
