COMMITMENT TO LISTENING

A Shift In **Motivation**

- + Awareness of environmental sustainability in donation practices is important.
- + It is not about getting rid of items; rather, it is about ensuring that the items will positively impact health and well-being if transferred.
- + Encouraging leaders to assess the practicality and usefulness of donations can lead to more effective giving.

Ethical Standards

- + Commitment to the common good informs the understanding that good intentions alone are not sufficient in donation practices.
- + Demonstrate a commitment to respectful partnership by donating only what is useful and refraining from donating expired or broken goods.
- + Promoting the highest ethical standards in donations requires considering their full impact, including both positive and negative implications. It's not always true that 'something's better than nothing.'
