

Catholic Health Care in the United States

As the nation's largest group of not-for-profit health care providers, Catholic health care welcomes and respects people of all beliefs and traditions – attending to their body, mind and spirit.

1 *in* **6**

patients in the U.S. is cared for in a Catholic Hospital

Catholic health care systems and facilities are present in all 50 states providing acute care, skilled nursing and other services including hospice, home health, assisted living and senior housing.

Catholic hospitals often provide more public health and specialty services than other health care providers. These organizations' dedication to the common good often leads them to offer some traditionally "unprofitable" services.

- Not-for-profit, church-owned hospitals save more lives, release patients from the hospital sooner and have better overall patient satisfaction ratings.*
- Religious hospitals demonstrate significantly better results than for-profit and government hospitals on patient safety, length of stay and patient satisfaction.*
