Human Flourishing.<sup>SM</sup>*

**Source: State-specific Medicaid coverage and expenditure impact modeling provided by Manatt Health.** Total estimated Medicaid coverage loss and expenditure impacts, for which sufficient public data is available, is detailed in this interactive map. These estimates include the impact on Medicaid coverage and expenditures for the following provisions as listed in H.R. 1:

- Mandatory Work Reporting Requirements for Medicaid Expansion Enrollees
- Increasing Frequency of Eligibility Redeterminations for Expansion Adults
- Establishing a Moratorium on New or Increased Provider Taxes
- Limiting State Directed Payments
- Moratorium on Implementation of the Rule Relating to Eligibility and Enrollment in Medicare Savings Programs
- Moratorium on Implementation of the Rule Relating to Eligibility and Enrollment in Medicaid, CHIP, and the Basic Health Program

Each state-specific estimate shows the combined Medicaid enrollment and expenditure impacts of these provisions. Coverage loss by children and the aged has been included in the interactive map.

Note: These estimates do not account for expenditure or enrollment impacts of other provisions in H.R. 1, such as changes to Affordable Care Act Marketplaces. Further changes to the Medicaid provisions included in the bill are likely as it moves through the Senate.
