Program Description

Health needs have shifted, and so has health care delivery. Increasingly, hospitals are reaching out to religious communities as healing partners in addressing today's community health priorities.

This educational event is designed to inform those engaged in integrating faith and health about the concept of transitional care and how it impacts quality of life, post hospital discharge.

Our featured speakers will present current transitional care models and collaborative approaches that allow faith communities to participate in improving and sustaining healthier neighborhoods outside their own walls.

A \$50 registration fee includes continental breakfast and lunch. No refunds will be provided.
