

Healthcare Supply Chain Week

Healthcare Supply Chain Week is observed in the first week of October.

God our Creator,
all things are of your making and all times belong to you.
In your plan of creation you have made humankind the stewards of the things of the earth.
This National Healthcare Supply Chain Week helps us to recall with gratitude
our responsibility of stewardship for the many articles and processes
that make possible our ministry in your name.

Bless those who ensure the smooth flow of medical and other supplies among us,
and help us all to be mindful and careful of these limited resources
that are directed to the health and wellbeing of our patients.
For you are our ever-provident God,
and it is in your holy and life-giving name that we pray.
Amen.
