

Medical Transcriptionist Week

The third full week in May is set aside as Medical Transcriptionist Week.

Lord of all compassion,
our healthcare ministry relies on so many people.
Among these none is more important than those
who help us keep accurate and helpful clinical documentation.
Their skills help provide a bridge between our caregivers,
the bridge that makes possible quality care in your healing ministry.
Strengthen these coworkers, O Lord,
and help them to know our deep gratitude for what they provide us
and the skill and generosity which they bring to their work.
In your life-sustaining name we pray.
Amen.
